

The United States imposes tariffs on photovoltaic panels

What are solar panel import tariffs?

Solar panel import tariffs are primarily intended to support the development of a new U.S.-based solar module manufacturing supply chain, which is financially backed by the Inflation Reduction Act. This act introduces a series of tax credits designed to bolster domestic manufacturers. For solar modules, the credits are as follows:

Will the US impose a tariff on solar energy in 2024?

Now, in 2024, as the solar industry strives to fully scale and establish itself, the U.S. has imposed five import tariffs, one geographical import ban, and has also recently initiated an additional tariff case now under investigation.

What tariffs did Trump impose on solar panels?

Following lawsuits by Suniva, the Trump administration implemented two additional tariffs: Section 201 & Section 301, applying to solar modules and hundreds of other items, respectively. The Section 201 tariff imposed a 30% import tariff on all solar modules from all countries, decreasing 5% annually until its scheduled end.

Which solar companies should have additional tariffs imposed on them?

A Commerce Department official said Friday that five of them - BYD Hong Kong, Canadian Solar, New East Solar, Trina and Vina Solar - should have additional tariffs imposed on them.

Why are US tariffs on solar panels coming to Southeast Asia?

Nov 29 (Reuters) - U.S. trade officials are expected to announce on Friday a new round of tariffs on solar panel imports from four Southeast Asian nations after American manufacturers complained that companies there are flooding the market with unfairly cheap goods.

When will the new tariffs on solar panels come into effect?

However, the additional tariffs won't apply until June 2024; President Joe Biden waived the tariffs on solar panels last summer for a two-year period after outcry from US solar companies who were concerned the tariffs could effectively shutter the industry.
