

The tricks used by photovoltaic panels to deceive people

How do I avoid a crappy solar panel deal?

To avoid a crappy solar panel deal, watch out for these scammy sales tactics. Dealing with door-to-door salespeople is annoying, no matter what they're selling. But the solar industry is full of bad actors, with solar salespeople knocking at your door with misleading offers and overpromised savings.

How do I avoid solar panel scams?

Getting multiple quotes and thoroughly vetting installers is the best way to avoid solar panel scams. You can also use solar.com to compare quotes from our network of thoroughly vetted installers.

Are solar panels eco-friendly?

Solar panels offer a low-maintenance solution for sustainable energy. While harnessing solar energy is a green initiative, some people worry about the eco-friendliness of solar panel production. However, solar panels often offset the energy used in their manufacture within one to four years of operation.

Can a government or utility official sell solar panels?

Now, any government or utility official trying to sell you solar panels should raise a red flag because governments and utilities don't sell or install solar panels. The bottom line is that there are solar incentives that can help reduce the cost of going solar.

Are solar panels producing electricity?

Almost two years later, Krieg says the panels aren't producing electricity, and she's still fighting with the companies involved. "Solar Sandy" is actually Sandra Cordero, a 63-year-old grandmother who says she used to be a nurse. Her business is a sales-only enterprise. Other companies actually install the solar panels she sells.

Do I need a solar panel if I'm getting a tax credit?

A solar salesperson may warn you that you need to have solar panels installed right away, as the solar tax credit system is close to being discontinued and you won't get that government check if you wait. First of all, this is a complete fabrication.
