

Tips for installing photovoltaic panels on vacant land

How do I choose a solar panel farm?

First, take a look at your land. If it's a flat, open space that's 20 to 25 acres, your land is a good candidate for an average-sized solar panel farm. You should also know that once a solar developer installs the solar panels, they'll have very little impact on the physical state of your land.

Do solar panels affect land value?

You should also know that once a solar developer installs the solar panels, they'll have very little impact on the physical state of your land. However, the presence of solar panels can improve your future land values. Land leasing for solar also provides you with a steady, reliable income.

Can solar farms be built on flat land?

As with most wind power projects, developers only place solar farms on land that meets certain conditions. The land should be sturdy for solar projects and not fall foul to sinking from soft soil. But it's also essential to consider the landscape for a site, as solar projects are particularly reliant on flat land without steep slopes.

How do I lease solar panels?

You can also lease the land to a company, university, or municipality that purchases the solar panels outright. Or you can lease your land to a solar developer like Verogy, who owns the solar panels and sells the energy to a company, university, or municipality through a power purchase agreement (PPA).

Should a tenant be required to leave solar panels on the land?

If the landowner validly forfeits the lease due to a breach of covenant or non-payment of rent, consider whether the tenant should be required to leave the solar panels on the land until all monies due to the landlord have been paid. Solar panels are a valuable asset and could be used to offset any debt owed to the landlord.

Can solar panels be installed in a conservation area?

To increase the chances of your solar panel installation being approved in a conservation area, you can make a few upfront choices, such as: Selecting solar panel styles that blend in with your roof or building's design, such as solar tiles. Black solar panels tend to look much more appealing than blue
