Is the new Togo solar power plant sustainable?

H.E. Mohammed Saif Al Suwaidi, Director General of ADFD, said: "This new Togo solar power plant truly reflects the level of sustainable impact we can achieve through the ADFD and IRENA renewable energy development program."

Can Togo achieve universal access to electricity?

Demand for electricity in Togo has increased rapidly in line with economic growth, but energy production capacity remains insufficient to trigger structural transformation and private sector development. The progress made and the favourable outlook should help to achieve universal access to electricity, which the authorities have set for 2030.

What is Togo's main source of energy?

With a population of some 8.2 million people, Togo has traditionally relied on biomass as the dominant source of energy, which is a major contributor to pollution in the country.

Who developed AMEA Togo solar?

The plant was developed by AMEA Togo Solar, a subsidiary of AMEA Power- a global renewable energy developer based in the UAE. IRENA remained heavily involved in the project throughout the process, brokering discussions between the Togolese government, ADFD and AMEA Power, and presenting solutions to construction and financing challenges.
