

Top mounted solar photovoltaic panels

Which mounting option is best suited for my solar panel system?

The installation process also significantly determines which mounting option is best suited for your solar panel system. Ballasted mounts are one of the solutions available for installations on flat roofs, while attachments are necessary for installations on pitched roofs.

Are roof mounted solar panels a good choice?

Roof mounted solar panels are the most common selection for most households. Reasons for this vary but the main one is the cost. Generally, roof mounted systems are less expensive than ground mounted systems, because the main structure needed to sustain the panels is the rooftop itself.

How do I choose a photovoltaic mounting scheme?

An appropriate mounting scheme is crucial for photovoltaic modules' effective installation and optimal function. Factors to consider when choosing a mounting option include the type of roof, such as slope roofs, wind and snow loads, local building codes, and the orientation and tilt angle of the solar panels.

What is a solar panel mount?

Solar panel mounts secure solar panels either to your roof or on the ground. Solar panel mounts typically account for 10% of the total solar panel installation cost. IronRidge and Unirac are the best options for roof and ground mount solar systems.

How do I choose a solar mount for my roof?

Ballasted mounts are one of the solutions available for installations on flat roofs, while attachments are necessary for installations on pitched roofs. One important factor to consider when selecting a mounting option is the type of roof on which the solar panels will be installed.

What are the best solar mounting and racking brands?

The top two high-quality solar mounting and racking brands are: Originally, IronRidge supported mostly small, off-grid projects. But today, IronRidge is known for its uniquely shaped and durable XR rail series for pitched roofs. They have equally great options for flat roofs and ground mounts, as well.

Generally, roof mounted systems are less expensive than ground mounted systems, because the main structure needed to sustain the panels is the rooftop itself. This saves costs that otherwise would rise higher due to the ...
