

Trina Solar Photovoltaic Panel Quality Inspection Report

What is the relationship between Trina Solar and national photovoltaic quality inspection center?

Trina Solar and the National Photovoltaic Quality Inspection Center have started cooperation and technical services to facilitate the Chinese photovoltaic industry's transition into an ultra-high power era with high quality. They are jointly working on reliability testing of ultra-high power modules.

Does Trina Solar have an EPD certification?

Changzhou, China, Jan. 14, 2021 - UL, a global safety science leader, announced today that Trina Solar received UL's Environmental Product Declaration (EPD) certifications for its photovoltaic (PV) products, promoting transparency on their environmental impact.

How will Trina Solar's 210 modules perform this year?

Trina Solar's 210 modules are expected to account for 70% to 80% of its overall shipments this year. With ultra-high power 600W+ modules becoming a trend in the PV industry, the industry will continue to deliver more support for the innovative 210 solutions both upstream and downstream.

Is Trina Solar prepared for the 600W+ era?

Trina Solar's first 210 modules marked a new era in the photovoltaic industry last year. The company has been pushing for advances in module technology and increasing power, and has fully upgraded supporting products such as inverters and tracking systems to fit into the 600W+ era.

What is Trina Solar?

Trina Solar is a company that has been established since 1997 and is driven by innovative, reliable quality and customer value.

How does Trina Solar promote product transparency?

Trina Solar promotes product transparency through UL and EPD Italy Mutual Recognition Program to meet global sustainability requirements.

Trina Solar ensures the highest quality standards for our PV products across the entire supply chain. This mitigates risks and increases return on investment. Because of our dedication to ...

Our third-party inspections for photovoltaic systems include: First Article Inspections (FAI): Prior to mass production the solar panel properties are measured and compared with specifications to verify quality matches. In ...

Jinko Solar and Trina Solar have separately reported that on-field testing shows tunnel oxide passivated contact (TOPCon) solar modules outperform p-type back-contact PV ...

Trina Solar Photovoltaic Panel Quality Inspection Report

Unmatched in third-party recognition. As part of its commitment to quality and reliability in its own products and across the solar industry, Trinasolar has partnered with third-party testing ...

Solar Panel Quality Control Inspections. The solar power industry has been experiencing a huge boom in the wake of the Covid-19 pandemic, leading to a growing demand for solar panels, or photovoltaic ...

Large projects require a reliable partner and quality products. Don't demand anything less. Learn More ...
Trina's photovoltaic panels and solar system components provide clean, affordable ...

Trina Solar ensures the highest quality standards for our PV products across the entire supply chain. This mitigates risks and increases return on investment. Because of our dedication to delivering high-quality PV products, Bloomberg ...

Trina Solar is the first solar technology manufacturer to receive EPDItaly certification through the Mutual Recognition Program between UL and ICMQ, founder of EPDItaly. An EPD discloses a product's life cycle ...

The Renewable Energy Test Center (RETC) released its 2024 PV Module Index report, evaluating the reliability, quality, and performance of solar panels. Solar modules are ...

Trina Solar ensures the highest standards of quality for our PV systems across the entire supply chain, to mitigate risk and increase ROI. Quality Control for PV Systems, Best Solar Panels | ...
