

What is the future of solar energy in Trinidad and Tobago?

The gradual shift from energy generation using conventional sources, such as coal and natural gas, to clean energy is expected to drive the Trinidad and Tobago solar energy market. Various government initiatives are expected to create a significant amount of opportunities in the market.

Should Trinidad & Tobago invest in wind and solar energy?

Tapping into Trinidad & Tobago's vast wind and solar resources for domestic electricity consumption would allow it to export more natural gas and use the extra revenue to finance its broader, long-term energy transition plans. Why do financial institutions have a role to play in energy transition?

Are there green energy sources in Trinidad & Tobago?

As there currently are not many green energy sources available in Trinidad & Tobago, local businesses must work towards developing their own and place additional emphasis on energy efficiency and conservation.

Does Trinidad & Tobago have wind energy?

Wind energy is still in its infancy in Trinidad & Tobago. Despite the fact that many companies are now active in the renewable energy sector, many of these firms are not yet focused on wind, and for those that are, their wind-related activities are often marginal.

What is the electricity generation mix in Trinidad and Tobago?

As of 2020, the electricity generation mix in Trinidad and Tobago is dominated by fossil fuels such as natural gas, coal, and diesel. However, increasing demand for clean and stable energy is expected to be the primary driver for the solar power generation market in the country.

Who is building the largest solar project in Trinidad and Tobago?

Today, the Government of Trinidad and Tobago has officially given the green light to project partners, bp, Shell and Lightsource bp to begin construction of the largest solar project in the Caribbean.

Overview of Trinidad and Tobago's electricity system Electricity sector overview TABLE 1: Electricity sector overview Market Structure Total Installed Capacity Installed Capacity Generation Mix Total PPAs Single buyer market 2.1 GW Natural Gas: 100% 5 Key players in the power sector Trinidad and Tobago Electricity Company (T& TEC): T& TEC is the state-owned

Trinidad and Tobago's electricity generation is completely fired by fuel, but only 8% of its natural gas output is channelled to electricity generation. Directing the gas to its power stations deprives the country of potential revenues that could be gained from selling liquefied natural gas (LNG) as feedstock, especially given that only one of

**Energy Snapshot Trinidad and Tobago** This profile provides a snapshot of the energy landscape of Trinidad and Tobago, a two-island nation located off the coast of Venezuela. Trinidad and Tobago's electricity rates are some of the lowest in the Caribbean at approximately \$0.04 per kilowatt-hour (kWh), well below the regional average of \$0.33/kWh.
