

How can energy service companies support energy audits in Trinidad & Tobago?

Energy Service Companies (ESCOs) for the conduct of energy audits can be expected to play an increasingly important role, and T&T will be seeking to build local capacity in the conduct of energy audits and other energy services. Incentives currently being offered to encourage the conduct of energy audits in Trinidad and Tobago are as follows:

Should Trinidad & Tobago invest in wind and solar energy?

Tapping into Trinidad & Tobago's vast wind and solar resources for domestic electricity consumption would allow it to export more natural gas and use the extra revenue to finance its broader, long-term energy transition plans. Why do financial institutions have a role to play in energy transition?

Does Trinidad & Tobago have wind energy?

Wind energy is still in its infancy in Trinidad & Tobago. Despite the fact that many companies are now active in the renewable energy sector, many of these firms are not yet focused on wind, and for those that are, their wind-related activities are often marginal.

Are there green energy sources in Trinidad & Tobago?

As there currently are not many green energy sources available in Trinidad & Tobago, local businesses must work towards developing their own and place additional emphasis on energy efficiency and conservation.

Can Lightsource BP accelerate the energy transition in Trinidad & Tobago?

With the experience of bp and Shell, as major operators in Trinidad and Tobago's energy industry, combined with Lightsource bp's global solar expertise, the group represents the huge potential to accelerate the energy transition through collaboration.

How many photovoltaic systems are there in Trinidad & Tobago?

Two 2-KW of-grid photovoltaic (PV) systems are in operation at the University of Trinidad & Tobago and the Trinidad & Tobago Electricity Commission. Twenty-one 1-KW PV systems had also been installed at schools around the country by 2020. The electricity generation mix in Trinidad & Tobago is still dominated by fossil fuels.
