

How will a solar plant in Tunisia benefit from debt financing?

The 100-megawatt, \$86 million solar plant located in Tunisia's Kairouan governorate will benefit from up to \$26 million in debt financing from the African Development Bank, including \$13 million sourced from SEFA, a multi-donor fund that provides finance to unlock private sector investments in renewable energy and energy efficiency.

Why should Tunisia invest in Kairouan solar?

The plant is central to Tunisia's strategy to reduce its reliance on natural gas. It aims to bolster the nation's renewable energy share to an ambitious 35% by 2030, thus the Kairouan Solar project is not just about power generation; it is about regional transformation.

Who financed Tunisia's first solar project?

The African Development Bank and the Sustainable Energy Fund for Africa (SEFA), in partnership with the International Finance Corporation and UAE's AMEA Power, today herald Tunisia's first privately-financed solar project.

What are Tunisia's energy projects?

One third of the projects will be for wind farms and two thirds for solar photovoltaics. Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023.

How much electricity does Tunisia get from renewable sources?

Tunisia aims to generate 30% of its electricity from renewable sources by 2030. The country currently gets only 3% to 6% of its electricity from renewable sources, mostly from wind and hydro. Solar energy capacity is at 35 megawatts (MW). In addition to wind and hydro, the Tunisian government plans to use biogas to produce renewable energy.

What is the energy sector in Tunisia?

The energy sector in Tunisia includes all production, processing and transit of energy consumption in this country. The production involves the upstream sector that includes general oil and gas, the downstream sector that includes the only refinery in Tunisia and most of the production of natural gas, and varied electrical/renewable energies.

Against the odds, the Tunisian government is trying to get its authorisation programme for procuring small, on-grid solar PV projects back on track. It has launched a fifth bidding round and set a new feed-in tariff structure applicable to both current and past projects. It needs to persuade investors that things will be different this time.

Tunisia Daily Sun "Think Globally, ... L'&#233;dition 2024 d'Africa PPP est en passe de surpasser l'&#233;v&#233;nement de l'ann&#233;e derni&#232;re, qui avait r&#233;uni pr&#232;s de 200 professionnels de 14 pays pour deux jours de d&#233;bats productifs et de r&#233;seautage de haut niveau. ... Tunisia's ambitious plan to increase renewable energy production is geared toward reducing its overreliance on imported gas for its power generation that threatens its energy security. The Kairouan Solar Project will be the first milestone to achieve the government's plan and will pave the way for further private investments in the sector.

Scatec's decision to scrap its largest solar scheme, while renegotiating two smaller projects, provides a glimmer of hope to legions of other developers with stalled projects in Tunisia. African Energy's analysis points to ...

1 ??&#0183; The photovoltaic (PV) farms will be installed in the town of Feriana, in the Kasserine Governorate of west-central Tunisia. Qair owns 100% of the first 10-MW project, while the ...

AMEA Power is rapidly expanding its investments in wind, solar, energy storage and green hydrogen, demonstrating its long-term commitment to the global energy transition. AMEA Power has committed to mobilizing US\$5 ...

Progress at all five of the large solar photovoltaic concessions first launched in 2019 is an indication that Tunisia's renewable power sector may be moving forward despite extremely difficult political conditions.

To achieve this important result, our customer BEA Best Energy Africa, which has Sun Ballast products

## Tunisia african sun energy

available for prompt delivery and distributes them throughout the region, has chosen to collaborate with and provide Standard-system ballasts to a major Tunisian institute that trains photovoltaic system installation technicians.

Our goal at African Sun Energy, is to ensure that clean energy use becomes a staple for the people of Southern Africa. In the next few years, Botswana and her neighbouring countries in the SADC region can become greener, self-reliant nations in their energy provision practices.
