

As of 2023, Tunisia's electricity consumption primarily relies on fossil fuels, with more than 85% of its electricity generated from these sources, almost entirely from gas. Low-carbon energy, which includes wind and solar power, contributes a modest 3% to the electricity mix. Additionally, Tunisia imports nearly 11% of its electricity. This heavy reliance on fossil fuels has significant ...

Battery contract producer JR Energy Solution said on Wednesday that it has started construction of its first factory. The factory will manufacture the cathode and anode electrodes for its battery customers. JR Energy Solution will spend 40 billion won initially and 305.6 billion won in total up to 202

Tunisia-based cleantech Wattnow, which helps companies control their energy usage through the combination of its plug-and-play hardware and software solutions, has closed an undisclosed multi-million dollar funding round, led by Lateral Frontiers and 216 Capital. The round also features Outlierz Ventures, Satgana, Octerra Capital, and a group of strategic ...

Considering these circumstances, the lab of tomorrow in Tunisia aims to create innovative solutions in the fields of energy efficiency and decentralized generation of renewable energies. These new business models, which are developed in a collaborative way between Tunisian and European companies, try to address the challenge of increasing ...

JR Energy Solutions has built its business on understanding the opportunities and avoiding the pitfalls associated with the changing energy choices in the deregulated markets. We are prepared to help our customers exercise their power to choose a competitive energy supplier in the most intelligent and cost-effective way possible.

Orbit Engineering solutions is a company specializing in digital solutions for cloud-based Iot Smart Energy Management and Sustainability Solutions. By combining the real-time data monitoring and our electrical analysis capabilities, we are able to offer a complete IoT energy management and utility solution for both Industrial and Commercial spaces.

JR Energy Solutions provides expert energy consultation services to businesses of all sizes. Our team of experienced consultants works closely with clients to find out what their energy needs are, how they use energy now, and how they ...

why jr energy solution Being the world's first designated battery (electrode) foundry company and as a strategic partner, JRES supports clients' growth in the battery market by providing high-quality electrodes, sharing advanced production data through AI solutions as well providing a turnkey solution for establishing electrode manufacturing ...

The Government of Tunisia is taking steps to diversify its energy generation mix by bringing on hydropower and solar energy. As one of the most climate vulnerable Mediterranean countries, Tunisia's electrical system is expecting increased demand resulting from expanding peak-hour demand patterns, intensifying cooling needs stemming from greater warm spells, and ...

Energy transition has been a key element in Tunisia's official discourse for years, aligning with the global context that drives investment in renewable energies and reduces dependence on fossil energies. In this discourse, renewable energies, particularly photovoltaic energy and "green" hydrogen, are presented as the ideal solution that will enable the country ...

Germany and Tunisia work together to enhance their strategic and technical collaboration in the energy sector. The cooperation includes various fields, such as securing energy supply, supporting renewable energies, improving energy efficiency and grid development.

Energy Solutions et CompAir comptent développer sur le marché tunisien les systèmes d'air comprimé les plus performants dans leurs gammes. Pour ce faire, les deux partenaires ont mobilisé une enveloppe de 300.000 euros pour les équipements et la formation des ressources humaines.

Battery contract producer JR Energy Solution said on Wednesday that it has started construction of its first factory. The factory will manufacture the cathode and anode electrodes for its battery customers. JR ...

Partnerships for green energy solutions. Some of the projects that JR Gilbert Energy has been involved with include the development of unconventional resource plays, easy-to-apply artificial intelligence and machine learning to make improved business decisions, and cost-effective multilateral well solutions for oil and gas, geothermal and CO₂ ...

Fournisseur solutions en énergies renouvelables Helios Tunisia, vous propose des solutions énergétiques innovantes, écologique qui respecte l'environnement. Rejoignez-nous et ...

their renewable energy potential, such as Tunisia. The objective of this report is to look into the potential of Battery Energy Storage System (BESS) development in Tunisia, in line with national efforts towards a clean and sustainable energy transition as well as ensuring the optimal use of energy sources and improving energy security.
