

Can Tunisia build a large-scale solar project?

Tunisia's Ministry of Industry, Mines and Energy has kicked off a new procurement exercise for large-scale solar. Tunisia's Ministry of Industry, Mines and Energy has launched a tender for the construction of several large-scale PV projects with a combined capacity of 200 MW.

Does Tunisia support solar?

Tunisia is supporting utility-scale solar through a series of tenders, the latest of which was launched in January 2023. It also finalized a 500 MW solar tender in December 2019. The country's cumulative installed PV capacity stood at just 506 MW by the end of 2023, according to the International Renewable Energy Agency (IRENA).

What is the Tunisian Solar Plan?

The Tunisian Solar Plan aims at developing an additional renewable energy installed capacity of 3815 MW by 2030. The targeted share per technology is detailed in the chart on the right.

What is TuNur energy doing in Tunisia?

In Tunisia, Nur Energie is developing the world's first CSP solar export project between North Africa and Europe. For more information about the TuNur project please visit the TuNur company website:

What is TuNur energy?

Nur Energie has been present in Tunisia since 2008 working with local Tunisian and Maltese partners and investors to contribute to the solar energy industry in the region. The TuNur project consists of a 2,250 MW solar CSP power plant in the Sahara desert and a 2 GW HVDC submarine cable from Tunisia to Italy.

What is the TuNur project?

The TuNur project consists of a 2,250 MW solar CSP power plant in the Sahara desert and a 2 GW HVDC submarine cable from Tunisia to Italy. As the power plants become operational, they will generate circa 9,400 GWh of 100% renewable and dispatchable power per annum.

Solar Tunisia has massive potential for solar energy and although it is currently underutilizing this potential, things are changing with the government paying more attention to this energy resource. The 2010-2016 Tunisian Solar Plan aims to increase the use of renewables in the energy mix by increasing the use of solar energy; and this

Tunisia's ambitious plan to increase renewable energy production is geared toward reducing its overreliance on imported gas for its power generation that threatens its energy security. The Kairouan Solar ...

The first tender launched by the Tunisian Ministry of Industry, Mines and Energy concerns the development of eight solar photovoltaic projects. The call for expressions of interest is organised in several phases between 2022 and 2025. Each interested independent power producer (IPP) should select the site and submit a bid for a 100 MWp solar power plant.
