

How will Batam's solar export initiative impact Indonesia?

Several companies have already invested in Batam to establish facilities for producing solar cells and modules. This solar export initiative is expected to bring added value, create jobs, and support the development of Indonesia's solar industry.

Will Indonesia's New solar power plant be able to supply low-carbon electricity?

An Indonesian renewable energy company is set to construct \$9 billion worth of solar power plants on an island near Batam, with the aim of supplying low-carbon electricity to Singapore by 2027. Learn about this major initiative and its potential impact on the region's energy landscape.

Where is trembesi floating solar power plant located?

The Trembesi Floating Solar Power Plant with a capacity of 35 MWac or 46 MWp is located at the Trembesi Reservoir, Saguling District, Batam City, Riau Islands. The Trembesi Floating Solar Power Plant is a collaboration with PT TBS Energi Utama Tbk.

Will Tuas Power import electricity to Singapore?

Tuas Power intends to submit a proposal to Singapore's Energy Market Authority (EMA) by the end of November to import this electricity, which will be sufficient to power approximately 730,000 households.

Sunseap claims that the facilities, covering a 1600ha water surface area, will be the largest of their kinds in the world once completed. The Duriangkang Reservoir, which supplies more than 50% of Batam Island's freshwater supply, will benefit from the floating solar panels as they will reduce water evaporation, thereby retaining more water within the reservoir.
