

## Türkiye's tower battery

What is the target for battery storage in Türkiye?

The target for battery storage is 7.5 GW. With these and other clean energy measures, the government is boosting energy security as an integral part of efforts to decarbonize Türkiye's economy by 2053. The program is innovative for its use of country systems and for building a platform to diversify private financing.

How will Türkiye improve energy security?

The government aims to significantly scale-up solar energy to 52.9 gigawatts (GW) by 2035 from 9.5 GW in 2022. The target for battery storage is 7.5 GW. With these and other clean energy measures, the government is boosting energy security as an integral part of efforts to decarbonize Türkiye's economy by 2053.

Will Türkiye become a regional hub for battery production?

During the unveiling ceremony, President Erdoğan emphasized Türkiye's ambition to become a regional hub for battery production, offering a USD 4.5 billion incentive package to attract international investors.

What is the Türkiye electric vehicle incentive program?

In the automotive sector, the program introduces a USD 5 billion incentive package aimed at increasing Türkiye's production capacity to at least 1 million units annually. "We have created opportunities for global automotive companies and major vehicle manufacturers to invest in Türkiye's electric vehicle sector," President Erdoğan stated.
