

Who is world power solutions?

World Power Solutions is a global leader in providing the right energy strategy for your commercial or industrial business. We specialize in Energy Management which includes generation through alternative & renewable sources such as solar, and project management from start to finish.

How will Türkiye improve energy security?

The government aims to significantly scale-up solar energy to 52.9 gigawatts (GW) by 2035 from 9.5 GW in 2022. The target for battery storage is 7.5 GW. With these and other clean energy measures, the government is boosting energy security as an integral part of efforts to decarbonize Türkiye's economy by 2053.

What type of energy does Türkiye generate?

Approximately 56% of Türkiye's electric power generation capacity consist of renewable energy, including hydroelectric, wind, solar, geothermal, and biomass power plants, making Türkiye the fifth-largest generator of renewable energy in Europe and the 11th largest in the world.

How much power will Türkiye have in 2035?

According to Türkiye's 2020-2035 National Energy Plan, Türkiye's power generation capacity will reach 189.7 GW in 2035 (a 79% increase from 2023). Türkiye's share of renewable energy will increase to 64.7% with solar power capacity increasing 432% and wind capacity increasing 158%.

How to reduce energy demand in Türkiye?

Türkiye's energy demand growth dominated by fossil fuels needs to be reduced by an aggressive deployment of energy efficiency measures (Rosenow and Eyre, 2022), while fossil fuels need to be substituted by renewable energy coupled with an electrification of heating and transport (Gielen et al., 2019; DeAngelo et al., 2021).

How much power does Türkiye generate?

Türkiye generated 118 TWh of power from coal, ahead of Poland's 97 TWh and almost reaching Germany's 121 TWh. In 2013, 25% of power was from coal in both Türkiye and the EU. In 2023, this was down to a record low 12% in the EU, but reached a record high 36% in Türkiye. The rise in coal-fired electricity generation was driven by imported coal.

ISTANBUL, November 7, 2024 - The World Bank Group, in collaboration with the Republic of Türkiye's Ministry of Energy and Natural Resources, launched a new roadmap today which outlines the way forward to establish a successful offshore wind industry in Türkiye..
