

Why is Ukraine a key energy security issue?

"The situation in Ukraine is one of the most pressing energy security issues in the world today. Ukraine's energy system has made it through the past two winters thanks to the resilience, courage and ingenuity of its people and strong solidarity from its international partners.

Does Ukraine need a coordinated approach to energy security?

The report calls for a coordinated approach to ensure the energy security of both countries given their strong energy links. Ukraine joined the IEA Family as an Association country in 2022, following many years of cooperation on energy issues.

How can energy equipment be delivered to Ukraine?

This is the fastest and most reliable way to procure energy equipment to Ukraine. The EU Civil Protection Mechanism can deliver spare parts and used equipment that correspond to Ukraine's needs. Multilateral banks can help de-risking projects, through support for insurance and guarantees.

Is the Ukraine energy support fund restoring domestic generation capacity?

While the Ukraine Energy Support Fund is currently restoring and installing 2 GW of domestic generation capacity ahead of winter, a significant gap to cover the restoration needs still remains. We therefore encourage the international community to continue contributions.

How can we reduce the energy gap in Ukraine?

A co-ordinated and well-targeted effort can go a long way to narrow the gap. Governments and companies can donate to the Ukraine Energy Support Fund, operated by the energy community. This is the fastest and most reliable way to procure energy equipment to Ukraine.

Will Ukraine's energy supply move to a new footing?

Gas supply to that plant is set to move to a new footing and a new route once transit arrangements through Ukraine expire in January. The report calls for a coordinated approach to ensure the energy security of both countries given their strong energy links.
