

Could solar power be the backbone of Ukraine's energy system?

The war against Ukraine has led to massive destruction of the energy infrastructure. One consequence of this is blackouts in cities. In the future, renewables such as wind and solar power could form the backbone of Ukraine's electricity system. (Image: Oleksii Maznychenko /Adobe Stock)

Can solar power help prevent corruption in Ukraine?

They have determined that solar and wind energy would quickly deliver a distributed power supply system and prevent corruption. The war against Ukraine has led to massive destruction of the energy infrastructure. One consequence of this is blackouts in cities.

Are Ukrainians installing solar panels on their houses?

Some Ukrainians have begun installing solar panels on their houses. Ukraine has announced new grants to help housing cooperatives invest in panels and heat pumps. Some Ukrainians are looking to rent a small house outside Kyiv with wood-burning stoves.

How much energy can Ukraine generate?

This technical potential is enormous. The researchers estimate that the potential for wind energy is around 180 gigawatts, while for solar energy it's around 39 gigawatts. A total capacity of 219 gigawatts would vastly exceed the generation capacity of 59 gigawatts that Ukraine had at the start of the war.

What does Ukraine's shattered solar panel represent at COP29?

At COP29, Ukraine's pavilion features a shattered solar panel - a stark reminder of destruction while remaining a symbol of resilience.

Can Ukraine recover power from a decentralized energy system?

Whatever the future, the decentralized nature of some clean energies, in particular wind and solar, has allowed Ukraine to quickly restore power in ways that would be impossible with Ukraine's more traditional energy sources, such as coal-fired power plants.
