

United Kingdom power backup solutions for office

Does power control provide backup power for commercial premises?

From council and government buildings to hospitality, sports stadiums and education, Power Control provide backup power for commercial premises. We have partnered with some of the world's leading UPS manufacturers to supply UPS systems and power protection from 800VA through to 6.4MVA.

Can APC back-ups handle power fluctuation?

Back-UPS can handle any power fluctuation and comes in tower or floor models. Shop APC Back-UPS Operate with confidence knowing your routers, modems, storage devices and more will keep running, regardless of shifts in power supply.

Which ups should I choose for my office?

To protect devices such as routers, switches and Wi-Fi access points, which in offices are often located under a suspended ceiling, we recommend the , a slim-line model UPS with high-performance surge-protection built in. Thanks to its EcoControl function, it offers significant energy savings compared to previous-generation models.

Every year, thousands of homes and businesses lose power supply for hours or days because of emergencies and natural disasters. Many utility power suppliers and distributors reactively call for support during these incidents, resulting in increased costs, delays to restoring power, and a reduction in cost-efficiency due to over-specification for the emergency response.

Since separate backup and anti-virus solutions are not designed to work together, gaps in your defenses are created. Juggling multiple interfaces also makes managing your protection more complex. Plus, buying separate backup and anti-malware solutions simply costs more. Why pay for two solutions when one provides greater protection?
