

United Kingdom solar installation price

How much will 10 solar panels cost in the UK?

The cost of 10 solar panels in the UK can vary based on several factors, including the type of panels and the brand you choose. Depending on the size of the solar panels, it will cost between £5,000 to £6,000 to install 10 solar panels, not taking into account labour costs.

How much does a solar system cost in the UK?

Starting with some base figures, solar systems in the UK start around the £3,500 mark but often top out at £20,000. To put that in perspective, let's look at a case study of a typical UK house. Please note: these figures don't consider the average annual (est. 3.6-10%) increase in electricity costs from providers.

How much do solar panels cost?

Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500, whereas polycrystalline solar panels cost about £900 per kW. When it comes to thin-film solar panels, these cost between £400 and £800 per kW.

How much does solar PV cost in the UK?

Where you're based in the country can have a significant impact on solar PV prices. According to the MCS data, costs are generally highest in England (£2,227 per kW in 2023, measured over 104,000 installs) and lowest in Northern Ireland (£1,518 per kW across 1,316 installs).

Where should solar panels be installed in the UK?

Good design and installation are critical to making the most of your solar PV system. In the UK, panels should be oriented as close to south-facing as possible for best performance - but anything from south-west to south-east should deliver good yield.

How long do solar panels last in the UK?

Answer: The payback period for solar panels in the UK typically ranges from 9 to 15 years, depending on factors like initial installation costs, electricity usage, and how much energy you sell back to the grid.

Solar installation costs vary. This is because each person is different. You may have different amounts of roof space, energy needs, and different roof tiles to name a few examples. Solar arrays vary in price. Depending on how many panels you want, it could cost anywhere from £4,000 for small system and up to £16,000 for a larger project.
