Can solar panels be installed on public lands in Nevada?

Solar panels on public lands in Nevada. Photo Credit: BLM Southern Nevada District Office WASHINGTON -- The Bureau of Land Management (BLM) today announced its proposed roadmap for solar energy development on public lands, designed to expand efficient and environmentally responsible solar project permitting on public lands across the West.

Where is the Elisabeth solar project located?

The BLM is also opening a 30-day public comment period on a draft environmental assessment for the Elisabeth Solar Project near Dateland, Arizona, located on 1,400 acres approximately 65 miles east of the City of Yuma within the Agua Caliente Solar Energy Zone.

How many solar panels are there in 2023?

Analysts estimate 2023 global installations reached around 440 GWdc, an 89% increase over 2022 installations, bringing cumulative global capacity to approximately 1.6 TWdc. A significant portion of the increase came from China, which deployed around 250 GWdc of solar.

What's new in the 2012 Western Solar Plan?

The plan updates and expands the original 2012 Western Solar Plan in order to reflect changes in technology and meet the higher demand for solar energy development. This plan analyzes five additional western states (Idaho, Montana, Oregon, Washington, and Wyoming), in addition to the six states analyzed in the original plan.

How many residential PV systems are there in the United States?

At the end of 2023, SEIA estimates there were nearly 5 million residential PV systems in the United States. 3.3% of households own or lease a PV system (or 5.3% of households living in single-family detached structures). Sources: U.S. Energy Information Administration, "Electric Power Monthly," forms EIA-023, EIA-826, and EIA-861.

Features of the Neptune Solar project: Photovoltaic (PV) solar arrays capable of generating up to 250 megawatts (MW) of clean, renewable energy and 125 megawatts (MW) of battery energy storage. The project encompasses ...
