How does the electricity sector work in Uruguay?

The electricity sector of Uruguay has traditionally been based on domestic hydropower along with thermal power plants, and reliant on imports from Argentina and Brazil at times of peak demand.

How will wind power affect Uruguay's future energy supply?

The current 6% private contribution to the generation park is expected to increase as investments in new wind power plants materialize. Renewables could play a role in future energy supply, in particular wind power, allowing Uruguay to reduce its dependence on imports.

What is the potential for large hydroelectric projects in Uruguay?

All the potential for large hydroelectric projects in Uruguay has already been developed. Existing plants are Terra (152 MW), Baygorria (108 MW), Constitucion (333 MW) and the bi-national Salto Grande, with a total capacity of 1,890 MW. Uruguay has a favorable climate for generating electricity through wind power.

What is the main source of energy in Uruguay?

Fossil fuels are primarily imported into Uruguay for transportation, industrial uses and applications like domestic cooking. Four hydroelectric dams provide much of the country's energy supply. Historically, energy has been a stronghold of state-owned companies, such as UTE and ANCAP.

How much electricity does Uruguay have?

Installed electricity capacity in Uruguay was around 2,500 MW (megawatts) in 2009 and around 2,900 MW in 2013. Of the installed capacity, about 63% is hydro, accounting for 1,538 MW which includes half of the capacity of the Argentina-Uruguay bi-national Salto Grande.

Why did Uruguay reopen the Nuclear Debate?

The energy crisis in Uruguay in 2007 led to Uruguay reopening the nuclear debate under the presidency of Tabaré Vázquez, when the Executive Branch established a multiparty committee devoted to the study of the use of nuclear energy to generate electricity and the installation of a nuclear power plant.

Energy in Uruguay describes energy and electricity production, consumption and import in Uruguay. As part of climate mitigation measures and an energy transformation, Uruguay has converted over 98% of its electrical grid to sustainable ...
