

What is lithium battery protection board?

The Lithium battery protection board is a small size board that provides protection against short-circuit, overcharge and overdischarge. The board comes with pre-soldered Nickel strips which makes it a ready-to-use module with 18650 cells.

What are the technical parameters of lithium battery protection boards?

Prevent the battery from being damaged by excessive current. Important technical parameters of lithium battery protection boards include overcharge protection, over-discharge protection, over-current protection, short-circuit protection, temperature protection, internal resistance, power consumption, etc.

How can Tritex protect a lithium battery?

You can customize the protection requirements of various additional functions for your lithium battery, such as communication function, SOC calculation, SOH estimation, warning function, recording function, display function, etc. Tritex can provide your battery with a professional protection board and BMS.

What determines the over-current capacity of a protective board?

The over-current capacity of the protective board is determined by the over-current capacity and quantity of the MOS tube. The MOS tube accounts for most of the cost of the protective board. Generally speaking, the charging current is smaller and the discharge current is larger.

Short-circuit protection board: It is intended to safeguard the battery pack from short-circuits, which could result in irreversible harm to the cells. Temperature protection board: Designed to protect Li-ion batteries from damage due to excessive temperature, which can occur during charging or discharging.

3s Li-Ion 8A 12.6V Protection board is a small PCB mounted Lithium Battery protection module. This small and smart protection module comes with various features like Short-circuits, Over-charge, Over-discharge and Over-current ...

Shop Protection PCB, Li-ion Cell Protection Board, Lightweight Multiprotect For 14 Series Li-Ion Cell Prolong Battery Life 3.7V Ternary Cell Lithium Cobalt Cell online at best prices at ...

Shop Li-Polymer Li-Ion Battery Pack Protection Board, BMS for 13S 48V/54.6V Batteries online at best prices at desertcart - the best international shopping platform in Vanuatu. FREE Delivery ...

2S Lithium-ion Battery Protection Board monitor protects two cells connected in series by monitoring the voltage and current in and out of the battery pack. It has an Operating Temperature range of -40 to 50°C.

Choosing a lithium battery protection board is an important task that requires a thorough analysis of the battery's features, the requirements of its use, and adherence to safety certifications. By carefully weighing these elements, you ...

BMS Li-ion Battery Protection Board; The tolerance is less than 30mAh; Single-cell consumption of battery (self-consumption): $\leq 3\mu\text{A}$; In this MOSFET are employed to do the monitoring task which protects our battery cells from overcharge; Package Includes:

BMS 5S 15A Li-ion Battery Protection Board Reference PRD-001304. Brand OEM. Charging Voltage: 21.0V; Suitable for 5S 18.0V 18.5V 21.0V Li-ion Battery; Overcharge Detection Voltage: $4.28 \pm 0.025\text{V}$; ... 10 string 36V 37V 42V lithium battery power protection board Overcharge, over discharge, over current and short circuit protection Same port 16A ...

The lithium battery protection board is a core component of the intelligent management system for lithium-ion batteries. Its main functions include overcharge protection, over-discharge protection, over-temperature protection, ...
