Does Vanuatu have a solar farm?

The Pacific island nation of Vanuatu is demonstrating its dedication to sustainability with the initiation of its largest solar farm on the island of Efate. This significant project marks a major step in the country's efforts to cut down on carbon emissions and take full advantage of its abundant solar resources.

What is Vanuatu's solar power project?

The Government of Vanuatu has set a target of 65 percent power generation from renewable energy by 2020 to increase energy security and fight climate change. With this project, 17,000 households throughout Vanuatu will be supported to access non grid, renewable electricity through solar.

How can Etech solar help Vanuatu?

The sun is a powerful source of renewable energy. We can harness that energy to create a sustainable future in Vanuatu and the world. eTech Solar is accelerating the adoption of quality yet affordable solar technology across Vanuatu to conserve our environment and provide an environmentally friendly and sustainable power supply.

Is solar a good idea for Vanuatu?

Antony Garae, Director of the Vanuatu Department of Energy, said this project is a great boon to his country, where 80 percent of rural residents lack electricity. "Solar is the best solution for these areas not only because of its obvious contributions to climate change mitigation but because fuel is costly and difficult to transport," he said.

Why is Efate launching a large-scale solar farm in Vanuatu?

The launch of Efate's large-scale solar farm is a landmark achievement in Vanuatu's stride towards complete sustainability in energy production. This project is set to positively influence the local environment, economy, and the daily lives of Efate's residents.

Is Vanuatu a sustainable country?

Beyond this large-scale farm, Vanuatu has introduced additional sustainable initiatives, such as the installation of solar-powered streetlights and small-scale solar systems in isolated communities. These efforts align with the nation's ambitious goal to source 100% of its electricity from renewable resources by 2030.
