San Marino: Energy intensity: how much energy does it use per unit of GDP? Click to open interactive version. Energy is a large contributor to CO<sub>2</sub> - the burning of fossil fuels accounts for around three-quarters of global greenhouse gas emissions. So, reducing energy consumption can inevitably help to reduce emissions.

Another decade of investment, with the acquisition of refinery and downstream assets worldwide. By the close of the 2010s, Vitol was invested in a downstream network comprising over 6,000 service stations, five refineries in three continents, 16 million cubic meters of storage and gas-fired power generation in the UK.

Using our leading market position and energy infrastructure to support the development of nascent energy solutions enabling scale and commercialisation. \$2.5 billion Committed to sustainable investments. 1.1GW Renewable power capacity. 5 Operations across 5 continents. Renewables. 1.1GW solar and wind generation.

...

Stan Mittelman, CEO, Vivo Energy, added: "LPG is an important component of the energy transition and is becoming increasingly popular in Africa as a cleaner source of energy than traditional fuels such as wood, charcoal or paraffin. It reduces CO<sub>2</sub> emissions and is easier for customers to access. A key part of Vivo Energy's strategy is to ...
