

# Venezuela new england bess

What is New England Bess?

The New England BESS is being built through the support of the NSW Government's Emerging Energy Program. In 2023, ACEN Australia secured a 20 year Long Term Energy Service Agreement (LTESA) for New England Solar in the NSW Government's first renewable energy and storage auction.

Who is supporting the New England Bess project?

The project is being delivered with the support of host landholders, First Nations and the Uralla community. The New England BESS is being built through the support of the NSW Government's Emerging Energy Program.

What is the Bess & how will it impact New South Wales?

The BESS will improve system strength and grid reliability, allowing more low-cost renewable energy to connect to the grid, lowering prices for New South Wales consumers. In March 2022, Ayala group's listed energy platform, ACEN, increased its ownership in UPC\AC Renewables to 80%, with the intent to be at 100 % ownership by early 2023.

How much electricity does the Bess project produce?

Once the entire 720 MW project is complete, it will produce around 1,800,000 megawatt hours (MWh) of clean electricity each year - enough to power about 250,000 New South Wales homes. The BESS project is supported by the New South Wales Government's Emerging Energy Program.

In 2022, the company was selected to provide the BESS at Victoria's 330MW Meadow Creek solar PV plant. Renewable energy developer Acen Australia appointed Energy Vault earlier this year to provide a 200MW/400MWh BESS for its New England project in New South Wales. This would also be co-located alongside a 720MW solar PV power plant.

Under the agreement, Energy Vault will deploy both a 50 MW/100 MWh BESS and a 150 MW/300 MWh BESS at ACEN Australia's 720 MW New England Solar, one of the largest solar projects to participate ...

Under the agreement, Energy Vault will deploy a 50 MW / 100 MWh battery energy storage system (BESS) and a separate 150 MW / 300 MWh battery at the site of ACEN's multi-stage 720 MW New England solar project ...

Transgrid Group's contestable business, Lumea, has signed an agreement with ACEN Australia to connect a new Battery Energy Storage System (BESS) as part of the New England Solar Farm project. Stage one of ACEN Australia's \$768 ...

The lithium-ion BESS is part of ACEN's 720MW New England solar facility being built in stages. Stage 1

commenced operation in 2023, with Stage 2 construction starting in later 2024. For more renewable and solar news, subscribe to ecogeneration .

13 March 2024, NSW, Australia - ACEN, through its wholly owned subsidiary, ACEN Australia, and SmartestEnergy have signed a Power Purchase Agreement (PPA) to offtake renewable electricity generated from Stage 1 of ACEN Australia's New England Solar project in NSW. The eight-year agreement provides SmartestEnergy with an offtake of 25% of the output of the...

The agreement commits the parties to work together on the delivery of the New England 400 MWh BESS. The 50-50 partnership has a projected investment amount of AU\$ 250 million with a target completion by 2025. Moroo Shino, Marubeni Asian Power Singapore president and CEO, added: "It is our pleasure to sign the MoU with ACEN Australia in the ...

Transgrid Group's contestable business, Lumea, has signed an agreement with ACEN Australia to connect a new Battery Energy Storage System (BESS) as part of the New England Solar Farm project. Stage one of ACEN Australia's \$768 million project is currently under construction near Uralla in the proposed New England Renewable Energy Zone (REZ).

Construction began in 2021 on New England Solar Farm near Uralla, which will pair 720MW of solar PV with a 50MW/50MWh BESS, with further details given in a progress update offered in March this year. CWP Renewables has approval for another NSW BESS project at a wind farm, this time a 150MW battery storage system for connection at Uungula, a ...

Get all the latest news on New England Solar Stage 1 operations and Stage 2 design and construction from our regular project updates. The updates are published each month in the Uralla Wordsworth and can also be found here on our website.

SSE's first battery energy storage system (BESS) project at Salisbury in Wiltshire, England is now fully operational. The 50MW / 100MWh BESS project, which could power over 80,000 homes\* ...

ISO New England also noted at that time that nearly all capacity supply obligations were awarded to wind, solar PV, energy storage or demand side reduction technologies. ... two of the bigger new projects known to have won are Cranberry Point, a 150MW/300MWh BESS in development by Plus Power, along with Medway Grid, a ...

ACEN Australia has signed an agreement with Transgrid Group's contestable business, Lumea, to connect a new Battery Energy Storage System (BESS) as part of its New England Solar Farm project. Stage one of

ACEN ...

Silverplate, International Silver Company, Meriden, Connecticut

"The construction of the BESS is a landmark project for the New England Renewable Energy Zone (REZ) and also the New South Wales economy," Northern Tablelands MP Adam Marshall said. Marshall said the BESS, which is critical in addressing the intermittency of renewable energy, was funded by an AU\$12.5m State Government grant.
