Walo Storage represents a major breakthrough as the first battery storage project in West Africa dedicated to frequency regulation. In a country challenged by grid constraints due to limited spinning reserves and the ongoing integration of intermittent energy, the Walo Storage project will bring much-needed stability to the local grid and reduce power outages.

Walo Storage represents a major breakthrough as the first battery storage project in West Africa dedicated to frequency regulation. In a country challenged by grid constraints due to limited ...

As the first battery storage project in West Africa dedicated to frequency regulation, Walo Storage is designed to stabilize the local grid and reduce blackouts. In addition, 16 MW of clean electricity will be generated ...

Africa REN, a renewables project developer in West Africa, announced the successful financing of its Walo Storage project in Senegal. The Dutch development bank FMO and the Emerging Africa Infrastructure Fund (EAIF), acting through its fund manager Ninety One, will invest up to a total of EUR32 million in syndicated debt into Walo Storage.

The Walo storage project will consist of a 10MW/20MWh BESS supplied by a 16MWp solar PV plant. Located in Bokhol, Senegal, the lithium-ion battery project will be incorporated into the solar PV plant, which will use a single-axis tracker system.
