

How much financing does verkor have?

14 September 2023 - Verkor secures more than EUR2 billion in financing following the signing of a minimum of EUR850m Series C funding<sup>1</sup>, approval of European Investment Bank for EUR600m debt support and French subsidies for an amount around EUR650m, subject to final approval by the European Commission. This financing will accelerate:

Who are verkor batteries?

Batteries. Now. For the future. Verkor was founded in 2020 with the sole ambition of fast-tracking low-carbon battery production in France, to serve the European market. With a team of international experts in the battery sector, Verkor strives for manufacturing excellence by optimising proven technology.

Why did verkor join the next 40 program?

This announcement rewards Verkor and recognizes its importance in the development of the electric battery sector, which is essential for French and European sovereignty and competitiveness. Verkor, a European pioneer in low-carbon batteries designed for electric vehicles, is among the 2023 class of the Next 40 program.

Where is the verkor factory in Dunkirk?

In the port of Dunkirk, the gigafactory has been completed and is starting to receive its first equipment. The Verkor factory site, Bourbourg (northern France), March 6, 2024. MARC DEMEURE /VOIX DU NORD /MAXPPP

How to choose a verkor battery?

Optimal power density: the battery will deliver maximum power. Its energy density may be lower, but with less internal resistance, the battery can charge and discharge faster. The unit of power is the Watt (W). With its optimised internal design and electrodes, the pouch is the best format for Verkor's batteries to achieve these two objectives.

Is verkor the next 40?

Verkor, a European pioneer in low-carbon batteries designed for electric vehicles, is among the 2023 class of the Next 40 program. The latter offers support designed for French scale-ups capable of becoming world-class technological leaders. This announcement rewards a very rich year for Verkor and marks an important milestone in its development.
