A vertical carousel (VC) is an automated storage and retrieval system that is designed to store inventory while reducing the floor area needed for storage, thanks to its upright and compact structure.. A typical vertical carousel comprises a series of carriers that are securely mounted on a closed-loop vertical track, all enclosed within a metal casing.

It simplifies the handling of heavy items, speeds storage and retrieval, and ends long waits for lift trucks. Integral pallets are vertically adjustable and feature a foolproof engagement design. ...

Vertical Lift Modules (VLM) are the highest quality vertical storage and retrieval solutions in the world, specifically created with space optimization and warehouse improvement in mind. With these systems, you'll be able to store up to 2,000 lbs. of equipment per tray, a total of over 150,000 lbs of equipment per system.
