

How will vflowtech support Singapore's Energy import sector?

Kumar sees VFlowTech's current efforts as just the first step in his vision for a cleaner world. He aims to support Singapore's energy import sector as the country shifts toward clean energy. "When that happens, they will need 30 to 60 gigawatt-hour flow batteries," he says.

Who is vflowtech?

VFlowTech is a Singapore-based long duration energy storage solutions provider manufacturing low-cost and efficient modular vanadium redox flow batteries. VFlowTech's long-term vision is to drive the world towards energy equity where everyone can access clean energy at affordable pricing.

Will vflowtech be able to power Jurong Island?

The company is currently working on a project that will let its batteries provide the power needs of Jurong Island, an area southwest of mainland Singapore that houses the nation's energy and chemicals industry. The project started in 2022 when VFlowTech was awarded a grant to build, test, and deploy its VRFBs on Jurong Island.

How can vflowtech help drive innovation?

Avishek Kumar, CEO of VFlowTech, says: "Bringing together various stakeholders is essential to drive innovation. Our partnership with Advorio, supported by agencies like JTC, EMA and EnterpriseSG, has demonstrated how collaboration can help scale and deploy advanced technologies for real-world impact."

Does vflowtech have a partnership with sing fuels?

VFlowTech has also formed partnerships with other organizations to accelerate the adoption of renewable energy storage technologies overseas. Last year, it collaborated with Sing Fuels, a Singapore-headquartered bunker trading company, to provide clean power to rural communities in Africa.

What is vflowtech VRFB?

VRFB is a type of rechargeable flow battery, known for its long-duration energy storage capability. Under the MOU, the three parties will explore using Advorio's tank infrastructure to scale VFlowTech's VRFB technology up to 40 megawatt-hours (MWh), about 25 times its current capacity.
