

Victron energy Tokelau

Can a solar array power Tokelau?

Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy. The renewable energy system comprising of solar panels, storage batteries and generators running on biofuel derived from coconut will generate enough electricity to meet 150% of the islands' power demand.

Who is victron energy?

We've been innovating battery-based power systems for almost fifty years; during that time we've become best known for building the world's largest range of Solar Charge Controllers, Inverters, Chargers, [...] Showroom of everything... Remotely monitor Victron Energy equipment all over the world.

Where does Tokelau get its electricity from?

Except for that part of the electricity supply provided by Solar Photovoltaic (PV) to TeleTok facilities on all three atolls and the University of the South Pacific (USP) facility on Atafu,essentially all energy in Tokelau currently is from imported petroleum.

How much electricity does a solar system provide in Tokelau?

Each system alone is among the largest off-grid solar power systems in the world,and together they are capable of providing 150%of current electricity demand in Tokelau,a much higher amount than the 90% that was originally planned for.

What is the Tokelau PV project?

The Government of Tokelau sees the PV Project as the first step and therefore trial towards the long-term goal of energy independence based on renewable energy. The project is implemented by the Government of Tokelau and funded jointly by Government of New Zealand,Government of France,UNESCO Apia and UNDP Samoa.

Why is electricity so expensive in Tokelau?

Before the PowerSmart systems were installed on the nation's three atolls, Tokelau was highly dependent on imported fossil fuels to meet its energy needs and therefore vulnerable to international price fluctuations and increasing fuel costs, making electricity extremely expensive for both households and businesses.

Victron Energy"s DC-DC converters are useful if you do not have a suitable voltage device. Ensure that voltage is converted now. Field test: PV Modules. A real world comparison between Mono, Poly, PERC and Dual PV Modules. Mono. Total solar yield:--S Split-cell. Total solar yield:-- ...

Dynamic Energy Storage System is a powerful new feature available for grid-connected Victron Energy installations. It is particularly effective in Europe, for example, where it will save money if your energy provider publishes energy prices for the day ahead - as often happens in Germany and the Netherlands, for example - and it will also [...]

Victron online training. If you would like to know more about this product, we have an Online Training course available. Training includes a video, links to important reference resources, and an exam to test your knowledge. Successful completion is rewarded with a certificate. Online Training requires a free Victron Professional account.

Victron Energy has a strong, unrivalled reputation for technical innovation, reliability, and build quality. Our products are widely considered to be the professional choice for independent electric power. This site is powered by Victron Energy Energy. Anytime. Anywhere. ...

The Digital Multi Control is used to remotely view and adjust AC input currents, and turn on and off the Multi or Quattro. It is designed to integrate cleanly with your boat, vehicle or house system control panel.

Victron Energy was founded in 1975 by Reinout Vader. Victron designs and sells inverters, chargers and more related power conversion products. The company has 110 employees, which includes 45 R& D engineers. We are a technology focused and sales driven company, and to remain leading, we rely on a strong R& D team. Most products contain software ...

Harnessing the power of the wind makes sailing an unforgettable experience. All you want to hear is the sound of the wind blowing and the waves breaking. But what is the best way to power the on-board electronics while the engine and generator are switched off? Victron combines energy storage and solar generation to provide the power you need.

For instance the headline image above, taken in November 2014, shows the Victron Energy sales team - but who is who and what do they do? Besides their sales functions which cover regions throughout the world, the team also have diverse roles and product specialities. Because of this we thought it would be good to introduce you to some of them.

The Multi HS19 is a new series of high voltage hybrid inverters. The first model to become available is the (800VDC) 3-phase 15kVA model with four MPPT trackers (which have a voltage range of 80 to 1000VDC). A 30kVA ...

Ever wanted to run the Color Control GX/Venus GX firmware on a Raspberry Pi? Now you can thanks to Izak Burger whose guest blog below describes how this came to pass. For the geeks amongst you, please note that the port works on the Raspberry Pi revisions 2 and 3, but not on the original Pi 1, as it has a different CPU and floating point unit.
