

Wallis and Futuna solar powered kiosk

What can a solar kiosk do for Africa?

Additional Solar Kiosks Highlights Africa Development Promises' Success. Powered from a solar micro-grid, a kiosk becomes the retail home of power-based services such as battery charging, home lighting system sales and rentals, and rental of battery-powered tools (e.g., solar dryers, pumps).

What is a solar kiosk & how does it work?

Powered from a solar micro-grid, a kiosk becomes the retail home of power-based services such as battery charging, home lighting system sales and rentals, and rental of battery-powered tools (e.g., solar dryers, pumps). With power available for computers, the kiosk also serves as a base for training and instruction - ISV's education pillar.

How much solar power does a kiosk generate?

Solar panels atop the flat portion of the roof of each kiosk (not visible in the picture) generate approximately 2 KWp. This amount is sufficient to power at least 4 computers, a multi-function printer, a TV, refrigerator, lighting and security, provide charging, and, potentially, power Internet access.

Solarway's Solar Powered Kiosk is a business in a box. It is a unique business solution offering access to power in areas with no access to electricity. In 1991, BNP Nouvelle-Calédonie, a subsidiary of BNP Paribas, established a subsidiary, Banque de Wallis-et-Futuna, in the territory. Two years earlier Banque Indosuez had closed its branch at Mata-Utu, leaving the territory without any bank. Following this, the Bank of Wallis-and-Futuna (BWF) with its head office in Wallis was created in 1991.

Read on to explore how each of these factors affect a kiosk's life expectancy. Use frequency. Thankfully, durable interactive kiosks are built for use. However, frequent operation does play a role in how long a kiosk will be active in the field. If the kiosk is in a high-traffic, high-use area, expect a shorter life expectancy.
