

# Wave solar Wallis and Futuna

What is wave energy?

Wave energy is the largest unused renewable energy source on the planet, the European Commission says. How does it work, and how much power could it generate?

Is wave energy sustainable?

Wave energy is something of a golden apple. It's a truly sustainable form of energy with, according to research by maritime technology company Fugro Oceanor, an estimated 3.7 terawatts (TW) of potential. This figure is equivalent to 30% of total global energy consumption in 2013.

Could wave power save the world?

The EU says wave power could provide up to 10% of its energy by 2050, cutting the need for back-up fossil fuel generation. 38 Across the world, the growth of wave and tidal stream energy could create 680,000 jobs and add USD 340 billion of value to the global economy, the International Energy Agency estimates. 39

Are wave energy converters putting the industry on the cusp of commercialisation?

Girard's invention never saw the light of day, however, and for more than two centuries wave power stayed largely untapped. Now, though, innovations are leading to more resilient and efficient wave energy converters that could be putting the industry on the cusp of large-scale commercialisation. What is wave energy?

Will wave energy become more expensive than wind and solar?

This is normal for a niche technology. If wave energy expands and the technology is able to mature rapidly, the cost falls could mirror those seen with wind and solar energy when they became more widespread 19; the EU Joint Research Centre estimates it could become just twice as expensive as wind and solar within the next six years 20.

Should governments use wave energy converters?

Today, as conflicts continue in Ukraine and the Middle East and geopolitical tensions grow, wave energy converters offer an option for governments seeking both zero-carbon electricity and domestic energy security.

To get to Wallis you must fly from 1 of 2 airports, the best option generally being Noumea. Noumea has flights from Japan, Australia, Fiji, New Zealand and French Polynesia. You can get to Japan, Australia, and French Polynesia pretty easily from the US mostly California but there are direct flights to Narita from Northern hubs like Detroit, NY ...

The Global Solar Atlas provides a summary of solar power potential and solar resources globally. It is provided by the World Bank Group as a free service to governments, developers and the general public, and allows users to quickly obtain data and carry out a simple electricity output calculation for any location covered by the solar resource database.

## Wave solar Wallis and Futuna

WaveRoller is a wave energy converter that is anchored to the seabed in water depths of between 8m and 20m, where the surge of the waves is most powerful. At the same time, it is located near enough to shore to avoid ...
