

# WeChat can be linked to the square power grid

How secure is WeChat?

WeChat. People wouldn't be able to speak to their friends or family without it. So the censors who can lock you out of Wechat hold real power over you. The app - thought by Western intelligence agencies to be the least secure of its type in the world- has essentially got you over a barrel.

Why is China developing a smart grid?

With an increasing amount of power attached to the grids, experts pointed out that the fluctuations in power generation from renewable sources can lead to issues like voltage instability, compounding challenges to stable power supply and transmission. Facing growing demand, China has rapidly advanced its smart grid development in recent years.

Is WeChat a powerful weapon of social control?

But it is also an ever more powerful weapon of social control for the Chinese government. I've just been locked out of WeChat (or Weixin ?? as it is known in Chinese) and, to get back on, have had to pass through some pretty Orwellian steps - steps which have led others to question why I went along with it.

Why is the smart grid sector on a fast track?

The smart grid sector is on a development fast track buoyed by the need for a stable and reliable power supply, as an increasing amount of power is generated from intermittent renewable energy sources, experts said.

Does everyone in China have WeChat?

In China pretty much everyone has WeChat. I don't know a single person without it. Developed by tech giant Tencent it is an incredible app. It's convenient. It works. It's fun. It was ahead of the game on the global stage and it has found its way into all corners of people's existence.
