

Where are Webasto batteries made?

Our battery systems are developed, tested and produced in the Webasto plant Schierling in Germany- so every battery meets the very highest standards. The thermo management solutions from Webasto shorten charging cycles, extend battery life and ensure pleasant temperatures inside the vehicle.

Is Webasto a sustainable Battery Company?

For passenger cars, Webasto develops battery systems according to customer specifications. The automotive supplier is striving to reduce the ecological footprint in the development and production of batteries. On the way to more sustainable battery systems of the future, Webasto is showing initial ideas.

What is a Webasto standard battery system?

For example, the Webasto Standard Battery System for commercial vehicles is equipped with a robust casing and efficient thermal management. It is particularly suitable for demanding applications such as on construction sites or off-road.

How does Webasto develop a vehicle system?

When electrifying vehicles, Webasto develops a vehicle system together with its customers. The Standardized Battery Systems meet the highest requirements for quality, safety and performance. Webasto produces according to the strictest German safety standards and prototype development as well as testing are also carried out in-house.

Why should you choose Webasto CV standard battery system?

The Webasto CV Standard Battery System guarantees top-notch quality and safety. Its modular, scalable design caters to diverse vehicle types, offering robust housing, unwavering quality, and efficient thermal management. With our standard portfolio you can start directly with the electrification and get started even with small quantities.

Why did Webasto invest in e-mobility?

In 2016, Webasto has decided to invest in e-mobility. Since then, the company drives ahead the development and production of individualized as well as standardized battery systems. For example, the Webasto Standard Battery System for commercial vehicles is equipped with a robust casing and efficient thermal management.

Unlock superior performance with Webasto's CV NextGen Battery. Ideal for diverse on- and off-highway vehicle applications, it boasts high volumetric energy density in a compact design. ... (HVH) is the ideal heating system for battery electric vehicles (BEV) and plug-in hybrids (PHEV). It converts DC electric power into heat with practically no ...

Lohr relies on battery systems from Webasto. Starting in October 2021. The French transport company Lohr

will launch Cristal, the all-electric modular shuttle system, in four cities in France. The vehicles will be powered by batteries from Webasto, one of the 100 largest suppliers to the automotive industry worldwide. ... One of the most modern ...

The Webasto Standard Battery Pro 40 is designed according to the highest safety and quality standards. ... The Webasto Standard Battery Pro 40 is a successor product to the CV Standard Battery System and offers even more energy in the same installation space. Thus, it provides an even higher energy density for various vehicle applications. ...

Stockdorf - March 23, 2022 - Whether airport vehicle, truck or construction machinery - Webasto now offers the necessary assistance for companies that wish to convert their commercial vehicles from conventional combustion engines to electric power. The company's Battery Services division supports its customers through the entire process of vehicle electrification and beyond.

Originally developed for fuel cell testing applications and for systems that require additional sinking power, Webasto customers have also used this versatile machine to cycle hybrids and batteries. The ABC-170 offers power from +125 kW to -170 kW, with a voltage range of 8 to 445 VDC and a current range of +530 ADC to -640 ADC.

Automotive supplier Webasto has implemented a one-megawatt-hour (MWh) battery storage system at its plant in Schierling, southeast Germany. The system utilizes 30 second-life commercial vehicle batteries to store electricity generated by the facility's solar power system, enhancing its energy sustainability.

CV Standard Battery System. ... Le syst&#232;me de batteries Webasto CV Standard r&#233;pond aux normes de qualit&#233; et de s&#233;curit&#233; les plus strictes. Gr&#226;ce &#224; sa conception modulaire et ...

Gilching, May 14, 2024 - As part of a product update, Webasto is increasing the energy content of its traction batteries from 35 to 40 kilowatt hours (kWh). The standardized product design of the new Standard Battery Pro 40 gives existing and new customers planning security for the coming years and facilitates multi-year electrification projects.

Die Webasto Standard Battery Pro 40 legt Wert auf Sicherheit und Qualit&#228;t und zeichnet sich durch ein modulares und skalierbares Design aus, das f&#252;r verschiedene Fahrzeugtypen geeignet ist, von leichten Nutzfahrzeugen bis hin zu mobilen Arbeitsmaschinen. ... Die CV NextGen Battery, Nachfolger des CV Standard Battery Systems, dient als ideale ...

Il Webasto CV Standard Battery System soddisfa i pi&#249; elevati standard di qualit&#224; e sicurezza. Con il suo design modulare e scalabile, funge da versatile batteria di trazione per un'ampia gamma ...

CV Standard Battery System Le syst&#232;me de batterie Webasto CV Standard garantit une qualit&#233; et

une s&#233;curit&#233; irr&#233;prochables. Sa conception modulaire et &#233;vulsive s"adapte &#224; divers types de v&#233;hicules, offrant un bo&#238;tier robuste, une qualit&#233; in&#233;branlable et une gestion thermique efficace.

The Webasto CV Standard Battery System guarantees top-notch quality and safety. Its modular, scalable design caters to diverse vehicle types, offering robust housing, unwavering quality, and efficient thermal management.

All Webasto power cycling systems are equipped with a real-time clock on the system's control board that enables measurement of Ah and kWh during cycling. Benefits of Power Test System MT-30 This cutting-edge power system delivers a 99 % power factor and over 92 % regenerative efficiency, with dual independently controlled channels and analog ...

Webasto is expanding its product range with Electrical Battery Thermal Management (eBTM). The compact and scalable system is designed to keep the traction batteries of electric trucks, vans, buses and construction ...

We wanted to bring a vehicle that demonstrated Webasto's capabilities in battery, thermal management and charging, but also let the general public know that electric vehicles can be fun to drive. It can be exciting.

The battery system is manufactured at Webasto's Schierling plant in Bavaria. One of the most modern battery system production facilities is located here - the highly flexible Multi-Product-Line, which can produce up to 40,000 battery systems per annum.
