

OCP owns Phosboucraa, which exploits the phosphate reserves of occupied Western Sahara; Acwa Power intends to construct two wind farms in the territory, each of 100 MW on a total land base of 10,341 ha. Acwa has previously installed two solar plants in the territory: the 85 MW plant in El Aai and 20 MW plant in Boujdour; ...

In November 2021, the governments of the world will meet in Glasgow for the COP26 climate talks. At the same time, Morocco - the occupying power of Western Sahara - is erecting its largest energy project on occupied land to date: another step forward in its comprehensive plan to build controversial infrastructure on the land it illegally holds.

Western Sahara [a] is a disputed territory in North-western Africa has a surface area of 272,000 square kilometres (105,000 sq mi). [3] Approximately 30% of the territory (82,500 km² (31,900 sq mi)) is controlled by the Sahrawi Arab Democratic Republic (SADR); the remaining 70% is occupied [4] [5] and administered by neighboring Morocco. [6] It is the most sparsely ...

On the question of Western Sahara, she commended the Secretary-General for his support to the ongoing political process, including through the visits by his Special Envoy to Rabat and Tindouf camp in 2022, as well as recent informal consultations in 2023.

Sahara's Upstream division is one of Africa's leading independent E& P players with a diverse portfolio of about nine (9) oil & gas assets in prolific basins across Africa and a production capacity of at least 10,000 bopd with plans to boost production to at least 100,000 bopd over the next five (5) years.

(Bloomberg) --Morocco, buoyed by recent foreign recognition of its rule over Western Sahara, plans to double green electricity production in the disputed territory to meet growing demand before it co-hosts the 2030 FIFA World Cup. The government has set a 2027 deadline to build 1.4 gigawatts of new wind and solar capacity in the region, said an energy ...

"Sahara, through its subsidiary, WAGL Energy Limited is already working towards investing \$1 billion to ramp up its LPG fleet and terminal infrastructure over the next five years. In addition to the vessel fleet, Sahara is in the process of building over 120,000 metric tonnes of LPG storage in eleven countries," he said.

OCP owns Phosboucraa, which exploits the phosphate reserves of occupied Western Sahara; Acwa Power intends to construct two wind farms in the territory, each of 100 MW on a total land base of 10,341 ha. Acwa has ...
