in Occupied Western Sahara Joanna Allan, Hamza Lakhal and Mahmoud Lemaadel The multiple ecological crises provoked by human activities are linked to and exacerbate the other political, social and economic challenges currently faced by North Africa.¹ In Western Sahara, these challenges and crises are shaped by its continued condition as a colony.

Green hydrogen (GH 2) prospects in Africa are developing at breakneck speed. But the biggest questions remain unanswered. Yes, Africa has the resources but can these highly capital intensive projects be made bankable while lenders demand heavy risk premiums on African projects?

In November 2021, the governments of the world will meet in Glasgow for the COP26 climate talks. At the same time, Morocco - the occupying power of Western Sahara - is erecting its largest energy project on occupied land to date: another step forward in its comprehensive plan to build controversial infrastructure on the land it illegally holds.

Through its roll-out of massive energy projects in occupied Western Sahara, Morocco becomes more economically connected to, and dependent on, the territory it holds under illegal, military occupation. It intends to export energy generated in the territory to Morocco proper, and to sell off any surplus to surrounding countries, including the EU. ...
