

To mark the delivery of the 6,000 Quantum energy storage units, the two companies, which have collaborated since 2019, confirmed the extension of their cooperation ...

W&#228;rtil&#228; said yesterday that the off-grid mining power system design is an end-to-end solution which leverages microgrids and renewable energy solutions for lithium mines at high altitude that deliver 20 kTons per year of lithium carbonate equivalent (LCE) from salt lakes.

W&#228;rtil&#228;'s energy storage division saw a 20% year-on-year increase in sales and a 31% increase in order intake from 2022 to 2023, with the company board in mid ...

Technology group W&#228;rtil&#228; has launched Quantum3, an intelligent cutting-edge battery energy storage system (BESS) with new safety, cybersecurity, energy density, and sustainability design features. Quantum3 is the latest addition to W&#228;rtil&#228;'s Quantum battery energy storage product portfolio supporting a global decarbonised future. Quantum3 ...

As well as delivering the battery energy storage system (BESS), W&#228;rtil&#228; is the project's engineering, procurement and construction (EPC) partner, and the deal with distributed energy project company AEP Onsite Partners includes a 10-year guaranteed asset performance agreement. W&#228;rtil&#228; has also offered further guarantees and commitments ...

Illustration of a solar-plus-storage site using W&#228;rtil&#228; Energy's GridSolv Quantum energy storage system. Image: W&#228;rtil&#228; Energy. Hickory Park Solar project, a 200MW PV power plant in the US state of Georgia, will be equipped with a battery energy storage system that allows the local utility company to maximise the benefit of the ...

"Concerns about fire safety from local stakeholders, communities and regulators can delay energy storage projects, or put them on hold," W&#228;rtil&#228;'s Darrell Furlong told Energy-Storage.news. "It's critical that the industry engages and responds to these concerns to pass permitting milestones and unshackle deployment."

W&#228;rtil&#228;'s decision to launch a strategic review of its energy storage & optimisation (ES& O) business, including potential divestment, may be because of its dilutive ...

The 250MW, 250MWh (1-hour duration) battery energy storage system (BESS) is sited on Torrens Island in South Australia, where AGL - Australia's largest generator-retailer ...

W&#228;rtil&#228;'s Quantum High Energy technology will first be deployed at Zenob? Energy's 600MWh BESS in Scotland, UK. Image: W&#228;rtil&#228;.. Technology provider and system ...

The order intake in W&#228;rtil&#228;'s energy business included 1,325MWh of energy storage for the first six months of the year, and 519MWh in Q2 between April and June: compared to last year when it booked just 23MWh of energy storage orders for the half year and 18MWh in Q2, and 460MWh for the entirety of 2020, the growth indeed appears strong ...

Its GEMS Digital Energy Platform was originally developed by Silicon Valley energy storage startup Greensmith Energy back in the 2010s before W&#228;rtil&#228; ES& O acquired the software-specialised system integrator and launched its own energy storage business. W&#228;rtil&#228;'s GEMS suite is now on its seventh iteration, as reported earlier this week ...

The Eraring BESS site, owned by Australian utility Origin Energy, recently saw its stage three expansion green-lit.. This makes it Australia's largest approved BESS with around 2,800MWh energy storage capacity, the same size as the existing black coal-fired power plant connected to the site's National Electricity Market (NEM).

A couple of months ago W&#228;rtil&#228; also said it is deploying another project in the country which it believed will be a first-of-a-kind for the Southeast Asia region: a 54MW / 32MWh BESS on a "floating power barge" which will be integrated with a 100MW floating diesel power plant, helping to reduce emissions and run-time and increase efficiency of the thermal power ...

W&#228;rtil&#228; Energy will supply its recently-launched GridSolv Quantum advanced energy storage solution to both sites, as well as the company's GEMS energy management software and controls platform. The contracts with Able Grid also include 10-year guaranteed asset performance agreements. The systems, called Ignacio and Madero, are thought to be ...

In a 2022 interview with Energy-Storage.news, W&#228;rtil&#228; ES& O head Andy Tang commented on the ongoing increase in average customer project sizes, which at the time stood at around 100MW/200MWh, ... Energy-Storage.news" publisher Solar Media will host the 1st Battery Asset Management Summit USA in San Diego on 12-13 November 2024. Featuring a ...
