

Wetility solar Cook Islands

Does wetility offer battery replacement?

Our Wetility lease options can also include battery replacement. The STRIDE system comes with a 5-year warranty. The Lithium-ion batteries we use are rated for 3000+full equivalent cycles and offer a strong shelf life. Is solar energy sufficient for off-grid living,especially with appliances like stoves?

What is wetility & how does it work?

Wetility enables you smartly generate solar poweron your rooftop,then seamlessly store,release and monitor clean energy to your home or business.We believe that we are here to harness the sun's power with purpose,introducing you to a hybrid solution that works seamlessly and in tandem with your current power options.

Does wetility offer a flexible financing model?

The upfront costs,however,have been a major constraint for most. Wetility offers a flexible financing modelthat's similar to a mortgage - customers pay monthly and eventually own the installed solar solution after a given term. To learn more about the company's innovative approach,we chatted to Vincent Maposa,CEO of Wetility.

What makes wetility unique?

Wetility has focused on leveraging our team's many years of experiencefrom energy sectors around the world. This enables us to curate an end-to-end customer experience that is trusted. Our team is dedicated to the vision of energy independence for everyone,and this has resonated with investors.

What is wetility pace?

We locally design and build the Wetility Pace (our all-in-one hybrid inverter and lithium ion batteries) and the proprietary software and pull this together to offer customers a one-stop location to access high-quality solar service that is affordable.

The Cook Islands energy sector relies 100 % on imported fuels for transport, electricity generation and household use. In the year 2005 the world has experienced a period of price volatility for petroleum that saw petroleum prices increase from US\$ 40/bbl in mid March to US\$ 70bbl in September. At present wind energy is

2 Cook Islands Country Energy Security Indicator Profile 2009 Climate Cook Islands has a tropical oceanic climate with two seasons. The drier months are from April to November and the wetter, more humid months, are from December to March. During the latter season, Cook Islands can experience occasionally severe tropical storms and hurricanes.

"According to my experience the Wetility system is convenient and helpful considering our electricity

problem: Load reduction that takes 5 hours. Wetility's system also keeps the business going with or without Eskom electricity. The solar system keeps the fridges and till machine working so that the customers' needs are satisfied. "

The Cook Islands Government aims to achieve 90% of their power needs from renewable energy by 2020. We helped the government realise its aim. To support the Cook Islands Government, the New Zealand Government - through the Ministry of Foreign Affairs and Trade, installed mini-grid photo-voltaic power systems in a number of villages on six remote islands.
