

What tax items does solar power generation belong to

Are solar panels taxable?

Often the electricity is used by the business operating out of the property with excess electricity being sold to the National Grid. Any receipt from such a sale is taxable. Tax relief is available on the cost of production including the capital costs of installing solar systems.

Is a sale of a solar system taxable?

Any receipt from such a sale is taxable. Tax relief is available on the cost of production including the capital costs of installing solar systems. The typical installation has a reasonable set up cost and then generates income which has low cost of production.

Are solar panels a special rate expenditure?

With effect from 1 April 2012 for corporation tax and 6 April 2012 for income tax, all capital expenditure on the provision of solar panels is specifically designated as special rate. The reason for designating solar panel expenditure as special rate expenditure was to ensure clarity of treatment.

Do I have to pay income tax if I generate electricity?

Where the generation tariff is received by an individual, other than in a business capacity, and it is not chargeable as miscellaneous income, no Income Tax liability will arise. This will usually be the case where an individual generates electricity mainly for use in their own home.

What is solar photovoltaic tax relief?

Since 2012 solar photovoltaic systems have been classified as items which attract an 8% annual writing down allowance tax relief. Also since 2012 the rate on which allowances can be claimed for any asset generating income under the feed in tariff is 8%. This compares to rates of up to 18% for tax relief on assets in other industries.
