

# Where is the Trina photovoltaic panel manufacturing plant located

Where is Trina Solar based?

Trina Solar has announced it will build a more than 1 million square foot solar photovoltaic (PV) manufacturing facility in Wilmer, Texas. The company is investing more than \$200 million in property and equipment.

Why did Trina build a solar plant?

"Trina's goal in building this facility is to begin to create an ecosystem of American manufacturing that can serve the burgeoning U.S. solar market." Trina has been US-based and regionally focused since 2006 and it incorporated in the U.S. in 2009.

How many solar modules has Trina Solar shipped?

To date, Trina Solar has shipped more than 170GW of modules, with shipments of 210mm modules surpassing 75GW. Trina Solar's global business footprint has delivered clean energy to more than 190 countries and regions. With its mission of "Solar energy for all," Trina Solar is committed to working with others to create a net-zero future.

Where are Trina modules made?

Dedicated production and new US manufacturing plant in Texas, just for the US provides long-term forecasting and reliability. Trina's modules are backed by Trina Protect, a 25-year product and 25-year power warranty so homeowners and installers have additional protection and peace of mind from a bankable partner.

Where is Trina based?

"As someone who has lived in Texas for more than a decade, I'm proud to bring Trina's first module factory in the Western Hemisphere to the Lone Star State," Zhu said. "This factory sets the stage for Trina to continuously expand business in the U.S. and show our customers that we are committed to providing best-in-class products.

Will Trina's Wilmer manufacturing facility be a shining example?

"This manufacturing facility will be a shining example of how the Wilmer community will continue to thrive with the long-term commitment that Trina is investing within our community," said Shelia Petta, Mayor, City of Wilmer.
