How do renewables companies protect trade secrets & confidential information?

Alongside patents, many renewables companies will use - and carefully protect - trade secrets and confidential information on various aspects of the relevant hardware and how they manufacture and deploy it.

Should a solar company develop a design optimisation strategy?

The solar company would then develop and protect its own in-house know-how around design optimisation - what factors to consider when selecting a site, the topography of the solar array, storage and design, as well as project development and asset management - that it will leverage in order to differentiate itself from the competition.

What role do patents play in renewables?

As with other sectors, patents play a central role in protecting rights in technology. Within renewables, most investment continues to be in solar and wind power.

Which category of trademark does solar photovoltaic power generation belong to Major wind and solar photovoltaic (PV) power generation are being developed in China. The following 2 ...

Trademark Class 36: Insurance, financial affairs; monetary affairs; real estate affairs. Trademark Class 37: Building construction; repair; installation services. Trademark Class 38: Telecommunications. Trademark Class 39: Transport; ...

Which category of trademark does solar power generation belong to

Concentrated solar power is not quite as popular for large-scale applications as using photovoltaic or PV panels, however, they do have a conversion efficiency of as much as 25% to 35%. 3. Water Heating Solar ...

Solar energy comes from the limitless power source that is the sun. It is a clean, inexpensive, renewable resource that can be harnessed virtually everywhere. Any point where sunlight hits the Earth's surface has the potential ...

Solar power uses sunlight to produce electricity by interacting with the electrons in solar panels. Panels are composed of photovoltaic (PV) cells that rely on the photoelectric effect to generate voltage. There are many advantages to solar ...

3. Further, solar power does not belong to anyone, as it is with fossil fuels, which means that anyone can use solar energy to produce electricity with no need to buy it from other countries. ...

The Federal Court has issued orders in Telstra's trademark case over to the name of its low-cost Belong brand. Melbourne-based solar power provider Belong Energy was ...

Ornate Solar successfully completed a 3.25 MW InRoof solar project for Jindal Steel and Power Limited (JSPL) in Odisha. Spanning an impressive 1,97,000 sq. ft. and installed at a height of 65 ft, this massive ...

The World Intellectual Property Organization (WIPO) uses a trademark classification system to group similar marks together. If you'd like to register your mark through the Madrid International Trademark System, it ...

With solar power, we can warm a room so we're nice and cozy, heat water for our showers and baths, create electricity or even cook food! Today we're going to focus on ways to create or harvest energy using solar power. ...

The latter belongs to thin-film (2nd generation) technologies rather than first generation. Monocrystalline silicon color is usually black or gray and fabricated from pure monocrystalline ...
