

# Will there be compensation for photovoltaic panels when a house is demolished

Can you get compensation if your solar panels are mis-selling?

If your solar panels are not reducing your electricity bills or providing you with the financial subsidies that you were originally promised by the company who sold them to you, you may be eligible for compensation. The solar panel industry is yet another of those currently embroiled in a mis-selling scandal.

Can I claim compensation for mis-sold solar panels?

If you feel you were mis-sold solar panels for your home you could claim compensation. Back in 2019, it was reported that the Financial Ombudsman Service had around 2000 complaints from unhappy customers who felt they had been mis-sold their solar panels, with more coming in every week.

Can solar panels reduce your energy bill?

Solar panels can help reduce your monthly energy bill - and if you think you can't afford them, there is help available. Solar panels can reduce your annual electricity bill by 70% and for the average three-bedroom house, solar panels will pay for themselves in 15.46 years.

Can I claim my solar panels if they go out of business?

So, if you funded your solar panels via a loan, credit agreement or by credit card, you may still be able to make a claim even if the original installers have gone out of business.

Do solar panels affect the conveyancing process?

With the rise in popularity of solar panels in recent years, many homes are now being sold with solar panel installations on the roof. While solar panels are very beneficial in reducing energy costs and providing a sustainable source of energy for your home, the presence of solar panels can have an impact on the conveyancing process.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Some common solar panel system sizes include a 3kW solar panel system, a 4 kilowatt solar panel system and a 5kW solar panels. For instance, a typical 2kW solar panel system suited for 1-3 people will need ...
