

Wind turbine generators rank first in sales nationwide

Are Chinese wind turbines the world's top five wind turbine manufacturers?

"It's no surprise that Chinese turbine makers dominate the top five in our ranking, as buildout of gigawatt-scale wind projects and an end to pandemic restrictions sent installations soaring last year," said Cristian Dinca, wind analyst at BloombergNEF and lead author of its 2023 Global Wind Turbine Market Shares report.

Who makes the most wind turbines in the world?

In 2018, Denmark-based wind turbine manufacturer Vestas had a global market share of around 20.3 percent. This was followed by Chinese company Goldwind at close to 14 percent that year. Wind power is generated when kinetic energy from wind is converted into mechanical power or electricity.

Who is the world's largest wind turbine supplier?

Danish supplier Vestas held the title as the world's largest supplier of wind turbines in 2020, thanks to the Danish supplier's wide geographic diversification strategy, with new installations in 32 markets last year, and strong performance in the United States (US), Australia, Brazil, Netherlands, France, Poland, Russia and Norway.

Who is the world's largest offshore wind turbine supplier in 2020?

Nevertheless, Siemens Gamesa retains its title as the world's largest offshore wind turbine supplier in 2020. *OEM annual installation data reported directly by OEMs to GWEC, includes onshore and offshore wind. These rankings will be published in the Global Wind Market Development - Supply Side Data 2020, which will be released in late April 2021.

Are Chinese turbine manufacturers moving up in global turbine OEM market rankings?

Chinese and American turbine manufacturers had a record of new installations that saw most of them moving up in global turbine OEM market rankings," said Feng Zhao, Head of Strategy and Market Intelligence at GWEC.

Is GE still the top wind turbine maker in 2023?

US turbine maker GE, which finished third in 2022, fell to sixth place in 2023, as its installations dropped 35% in its home market. The firm still maintained its spot as the top US turbine maker, but wind additions in the country fell to their lowest levels since 2017.
