

Can Iran build a strong wind sector?

With the help from Sadid Industrial Group (Iranian manufacturing company) and investments as well as resources from Indian (Sulzon Energy) and German (Siemens) wind turbine companies,Iran has been able to build a strong and stable wind sector.

Who are winder power?

The site services division for the Winder Power Group. Our specialist in-house team has over 100 years' combined experience in providing full range of services to companies of all sizes, from major utilities to specialist contractors.

Does Iran have a wind power plant?

Following the 1994 construction of Iran's first wind power plant in Manjilin the Gilan province,the government's policy has been to increase the participation of the private sector in the development of wind energy in the country. Most of Iran's wind power plants have been constructed over the last decade.

Can Iran build a 660 kW wind turbine generator?

Currently the first sample of the 660 kW generator was produced and put into operation in Iran. Based on domestic abilities,and building the first sample of this generator (pilot) and gaining the experience and knowledge of constructing this product,Iran has the capabilityof building 660 kW V47 wind turbine generators.

Is Iran a good place to invest in wind power?

Iran is situated in a wind belt and has a relatively good potentialfor wind energy compared to other countries in the Middle East. However,wind power constitutes an insignificant share in Iran's 80 GW power sector. This is mainly due to a limited number of wind power companies,highlighting the inadequate investment in this sector.

How can Iran promote domestic production of wind turbines & accessories?

In addition to the 20-year PPAs,the Iranian authority (SATBA) encourages domestic production of wind turbines and accessories by providing an additional 30% bonusif wind farms use Iranian turbines and components. Such a bonus could play an important role in promoting domestic R&D and production in the Iranian wind industry.
