

Worldwide energy and manufacturing usa Turkmenistan

Globally, our progress in shifting towards a low-carbon economy has been slow. That may leave us pessimistic about a path forward. But some countries - often some of the world's richest countries who have high carbon footprints - show us that significant progress on decarbonizing our energy systems is possible. They still have a long way to go but are moving in the right ...

As noted, it is the established trusting nature of interstate relations that allows Turkmenistan and the United States not only to implement the bilateral agreements reached, but also to form new areas of long-term successful cooperation, which includes productive interaction in the trade, economic, oil and gas and energy sectors, agriculture ...
