

Xiaomi enters photovoltaic mobile energy storage

What is the Xiaomi Mijia solar panel 100 W?

The Xiaomi Mijia Solar Panel 100 W is now available to pre-order in China. The device has been designed to charge the new Mijia Outdoor Power Supply 1000 Pro, allowing you to connect two panels for a 200 W charge. The panel folds to the size of an A2 page to make it easier to carry and has built-in MWT technology to boost efficiency.

Does Xiaomi's fast-charging technology save energy?

In 2022, more than 100 million smart devices and terminals used Xiaomi's fast-charging technologies, saving nearly 57 million kWh of energy consumption and 24,852 tons of CO₂ e emissions in comparison with conventional fast-charging technology (ESG REPORT 2022 p. 113) 2.

What makes Xiaomi group a green company?

As we all know, Xiaomi Group is a global consumer electronics and smart manufacturing company, and achieving energy savings through green technology innovation is a characteristic of Xiaomi Group's carbon reduction efforts.

Will Xiaomi achieve net-zero emissions by 2022?

This marks a significant step forward following Xiaomi's 2022 ESG Report, in which they stated their goal to reduce green house gas (GHG) emissions from their main operations to 2% or less from the base year level by no later than 2040, effectively achieving net-zero emissions.

How Xiaomi is reducing environmental impact?

Packaging: Comprehensive transition to the use of recyclable, biodegradable green packaging materials. Simultaneously, Xiaomi will spare no effort to reduce unnecessary packaging, achieving the maximum simplification of packaging and minimizing environmental impact.

Will Nio build its first battery plant?

NIO is planning to build its first battery plant to make cylindrical battery cells on its own for its electric cars, to reduce dependence on CATL for the sourcing of batteries.
