

Why did Gambia not import energy?

In countries that export large amounts of energy, falling energy prices can also cause major economic shocks. Gambia did not import energy. Energy sources, particularly fossil fuels, are often transformed into more useful or practical forms before being used.

What are the energy objectives of the Gambia?

As provided by the 2014-2018 National Energy Policy, the Gambia's electricity objectives are to increase electricity generation, enhance electricity fuel diversity with an estimated 30% use of renewable energy for generation, promote private sector participation, and improve access to an affordable and reliable supply particularly for rural areas.

What is the energy policy in Gambia?

The Energy Policy also promotes infrastructural development to enhance the secure supply of power. Gambia has an estimated population of 2,051,363 (CIA 2017) with approximately 3% population growth per year (The World Bank 2016). Agriculture and tourism are the backbone of the Gambian economic growth.

Why is the Ministry of Energy established in Gambia?

In order to achieve the energy objectives of the Government of Gambia, the Ministry of Energy was created in 2007. Gambia's long-term strategic plan, also known as Vision 2020, acknowledges that infrastructure, reliable power supply and access to energy are relevant to economic development in Gambia (GOG 1996).

Can the Gambia transform the energy sector?

An unprecedented level of support from the international community provides The Gambia with the opportunity to transform the energy sector and emerge as one of the leading energy sectors in the sub-region and the African continent. In this context, the Electricity Roadmap has undergone its third update since 2015.

Who are the biggest energy consumers in Gambia?

The biggest energy consumers are the household and transport sectors. As at 2010, only 35% of households in Gambia had access to electricity. Currently, there are approximately 12,000 electricity customers (The Gambia Ministry of Energy 2014) and the estimated electricity access rate is 47% (NAWEC 2017).
