

Xiyun Yang's 34 research works with 383 citations and 2,120 reads, including: Intelligent Control for Floating Offshore Wind Turbines Based on Game Theory with Data-Driven and Reliability ...

6 ???· NANJING -- An offshore wind power project with an installed capacity of 400,000 kW started operations on Monday in the Yangtze River Delta region in East China, an economic ...

The integration of large-scale wind farms and large-scale charging stations for electric vehicles (EVs) into electricity grids necessitates energy storage support for both technologies. Matching ...

Semantic Scholar extracted view of "Coordinated control strategy of multiple energy storage power stations supporting black-start based on dynamic allocation" by Cuiping ...

The cost of utility-scale wind power has come down dramatically in the last two decades due to technological and design advancements in turbine production and installation. In the early 1980s, wind power cost about 30 cents per kWh. In ...
