What is Yanmar energy systems?

Yanmar Energy Systems designs environmentally friendly CHP and GHP systems for reliability, efficiency, energy conservation, comfort, and long-term savings.

What engineering services does Yanmar offer?

With over 100 years of company culture, Yanmar's experienced engineering team provides reliable technical solutions for diesel, HFO and gas power plant projects. Our engineering services include site surveys, engineering consultancy, reliable technical solutions, energy supply security, power plant design services and project management.

What makes Yanmar a reliable engine?

Yanmar's reliability stems from the core technologies that drive our systems. The primary component of the Yanmar CHP and VRF systems is our Yanmar-designed, lean-burn Miller Cycle Gas Engine. The lean-burn system optimizes ignition timing and matches the excess air intake, reducing NOx emissions and creating low fuel consumption.

Who is the new CEO of Yanmar Energy Systems International?

Peter Aarsen appointed new CEO for Yanmar Energy Systems International; Samir Laoukili new President for Yanmar Europe B.V. Yanmar Europe B.V., EMEA subsidiary of the world-leading provider of power solutions from Japan, announces two new appointments.

Are Yanmar engines engineered for specific applications?

Yanmar products are engineered for specific applications. We have manufactured more than 250,000 gas engines for use in Energy Systems products and more than 15 million diesel engines ranging from 4.5 to 5,000 horsepower.

How efficient is Yanmar CHP?

By utilizing a highly efficient engine and capturing nearly all of the remaining energy as heat, the heat and power producing YANMAR CHP system can be up to 2.6 times as efficient as your current centralized power. YANMAR CHP Units are reliably quiet.
