How much does a solar system cost in Yemen?

Rassam paid about 50 million Yemeni rials (around \$90,000 based on the unofficial market exchange rate) for his system, which is considered large by local standards. The average cost of an array is around \$10,000. Rassam financed the solar panels with a loan from Al Kuraimi Islamic Bank, one of the country's largest private lenders.

Who is Jetman solar?

At Jetman Solar, we are committed to harnessing the power of the sun to provide clean, sustainable, and cost-effective energy solutions. As a leading player in the solar industry, we offer a comprehensive range of services, from wholesale solar equipment supply to expert installation services.

Is solar power a lifeline in Yemen?

"For many in Yemen, especially for farmers, solar power has been a lifeline," says Matt Leonard, who specializes in microfinance with IFC. "The key now is to scale up its use." Yemen has long been the poorest country in the Middle East and North Africa, but a conflict that broke out in 2014 has pushed the country to the brink.

Can solar power save Yemeni rials?

Farmer Mohamed Ahmad Sid El Rassam can attest to those benefits. He built a solar-powered water pump on his land in the region of Beni Hocheich. The setup chopped his diesel use by more than 85 percent, saving him 17 million Yemeni rials (\$68,000) a year.

What services does Jetman solar offer?

As a leading player in the solar industry, we offer a comprehensive range of services, from wholesale solar equipment supply to expert installation services. Whether you're a homeowner, a business owner, or a contractor, we have the expertise and products you need to make the switch to solar energy. **WHY CHOOSE JETMAN SOLAR?**

Why should you choose Jetman solar?

When you choose Jetman Solar, you're investing in the longevity and efficiency of your solar system. Our team of experts has a deep understanding of solar technology and the intricacies of solar installations. We stay up-to-date with the latest industry advancements to provide you with the best solutions and advice. Outstanding service.

Rechargeable emergency lights are lights that can be powered by batteries that can be recharged using a power outlet or solar panels. They are typically used as backup lighting in case of power outages or emergency situations. They can be used in homes, businesses, or other buildings to provide light during power outages.
