

What does the Electricity Act do in Zambia?

The Electricity Act regulates the generation,trans-mission,distribution and supply of electricityto enhance the security and reliability of electricity sup-ply in Zambia. It codifies the rules on tariff setting and introduces the concept of intermediary power trading,a concept that was missing from the previous regulatory framework.

Why should German and European service providers invest in Zambia?

For German and European service providers active in the energy sector,Zambia presents significant potential for business development. There are clear needs across the solar energy and storage value chain,including pro-ject development and financing,equipment manufacturing,system inte-gration and contracting.

What companies trade in electricity in Zambia?

Private companiesalso trade in electricity in Zambia. The largest of these,Copperbelt Energy Corporation Plc (CEC),buys electricity primarily from ZESCO and sells it to the various mines in the Copperbelt Province. It also operates its own generators,most of which run on fossil fuels.

Does Zambia have a good solar system?

Zambia benefits from excellent solar resources,with a specific production output between 1,600 and 1,800 kWh/kWp per year. The regions with the best re-sources are the south-west part of the country as well as the region around Lake Bangweulu,east of Mansa.

Does Zambia need hydropower?

In recent years,Zambia has been able to improve its electricity supply but remains largely dependent on hydropower. This dependency represents a risk to the security of supply,as evidenced by the return of scheduled load shedding at the end of 2022 until February 2023,due to low water levels on the Zambezi River.

Will the demand for power continue to rise in Zambia?

While the Zambian government accepts that the demand for power will continue to risein Zambia,it has taken the view that the demand will be much higher than the 95% projected under the COSS.
